

Step back to the Roaring '20s
when Smith Tower was young,
Prohibition was the law, and
Seattle was growing quickly.

As you move through the building,
keep your eyes and ears open
as you discover the good, the bad,
and the ambitious
people of Smith Tower.

OBSERVATORY EXPERIENCE

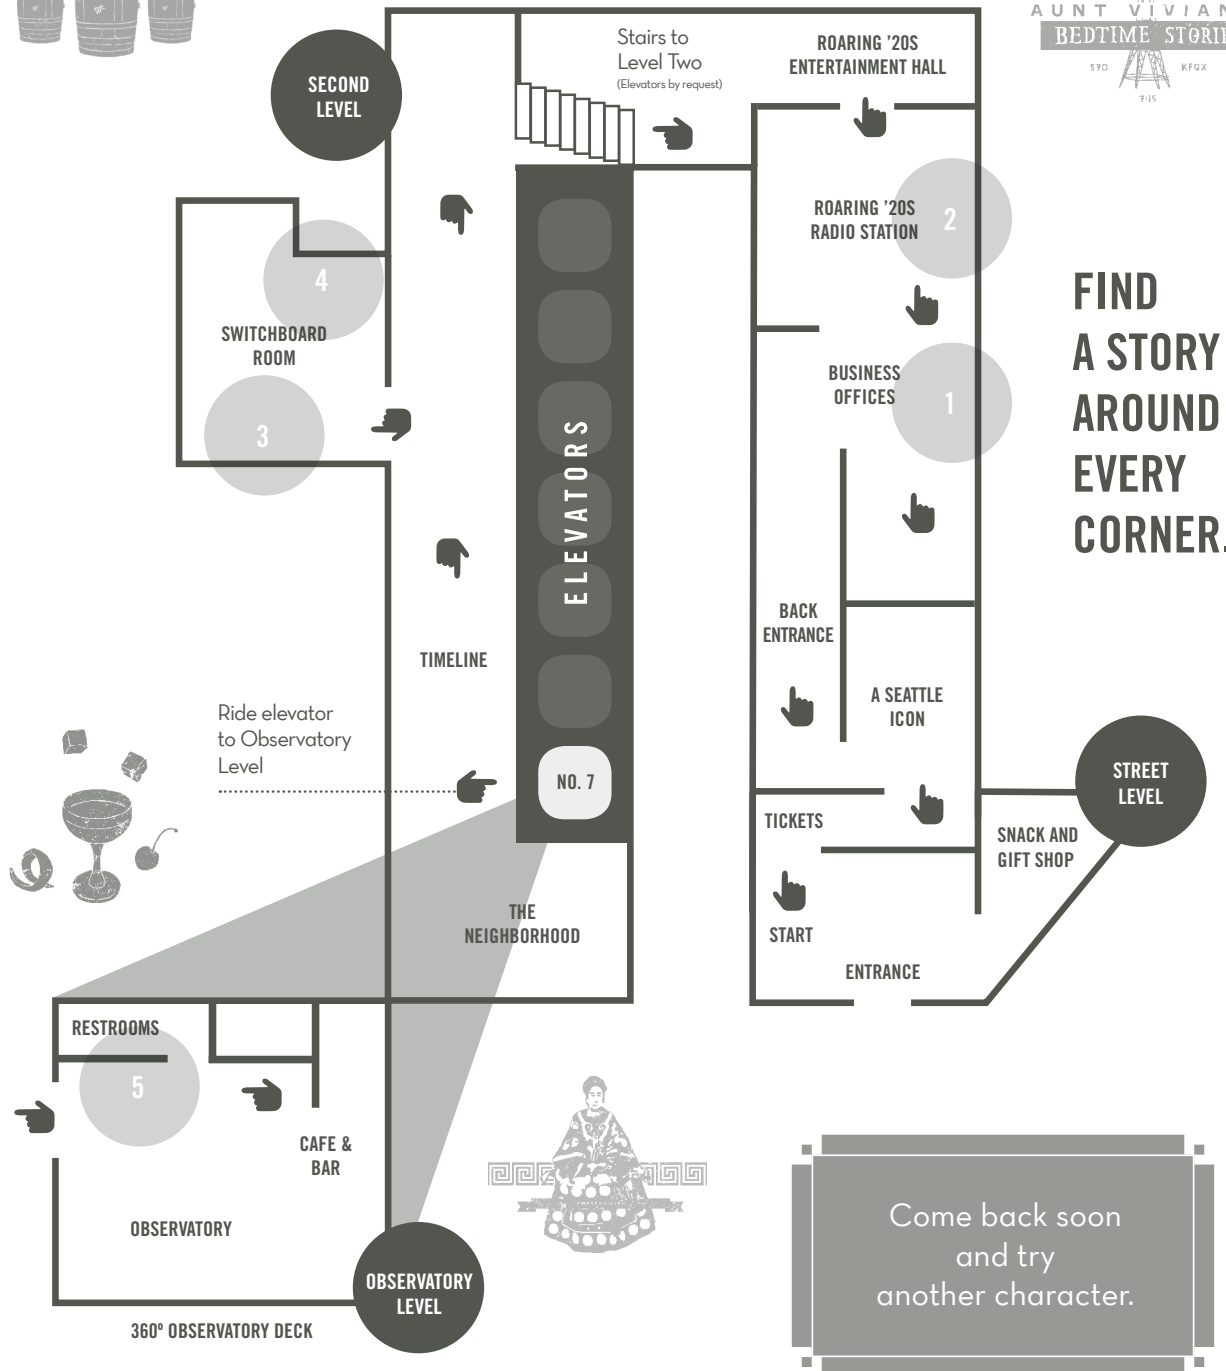

YOU ARE
Al Hubbard

The Rumrunner's Engineer

Hubbard is Seattle's celebrated "boy inventor," who claimed to develop the miracle coil in 1916 that produces power from thin air. Hubbard is just about to file his first patent. He runs station KFQX for the Olmsteads—and he's also the rumrunners' bag man paying off the cops.

YOU ARE Al Hubbard

**FIND
A STORY
AROUND
EVERY
CORNER.**

- 1 Find the business offices. What's the name of the building manager?

- 2 Find your desk in the radio station. What kind of patent have you applied for?

- 3 Listen to line 4 in the switchboard room. Does the private investor bite?

- 4 Explore the map. Where did you test the Hubbard Coil?

- 5 Find the Observatory. Did you go down with Roy Olmstead and Jerry Finch?

*Share any correct answer
with an Observatory staff
member for a reward.*
